Technical Skills

- **Proficient:** JavaScript, React
 - **Intermediate:** C#, Python, Express, Node.js, MySQL, Git
 - **Basic:** C, C++, Java
 - **Other Skills:** Project Management
 - **Soft Skills:** Communication, Teamwork, Problem Solving, Leadership, Adaptive Learner
-

Education

B.S. Computer Science

Brigham Young University - Idaho | GPA: 3.33

December 2024 - May 2027 | Rexburg, Idaho

- **Area of Interest:** Machine Learning/AI, Robotics
 - Applied software engineering best practices using JavaScript, React Native, Node.js, and PostgreSQL.
 - Gaining hands-on experience in software development, algorithms, and full-stack problem-solving using C, C#, Python, and C++.
 - Built and deployed responsive mobile-first applications in collaboration with senior developers.
-

Key Projects

Flight System Drone Sprayer

Rexburg, Idaho | *April 2025 - May 2025*

* Engineered functional C++ drone flight system project within 4 hours, utilizing Generative AI to maximize learning efficiency with unfamiliar principles. * Engineered newly learned C++ concepts into a fully functional flight-logic prototype, demonstrating the ability to rapidly apply unfamiliar technologies to real-world engineering problems.

Restaurant Reservation Application

Thinkful Chegg Software Bootcamp | Remote | May 2021 - June 2021

- * Engineered a full-stack reservation management system with RESTful APIs and database-driven CRUD operations, improving data reliability and streamlining user booking workflows.
- * Implemented React Router for seamless navigation and Express for efficient data handling. *
- Utilized Knex.js to optimize database queries and ensure smooth reservation workflows.

Flash Card Application

Thinkful Chegg Software Bootcamp | Remote | March 2021 - March 2021

- * Designed and engineered an interactive flashcard application that enables users to create, edit, and organize study decks, significantly improving their ability to learn and review material efficiently. *
 - Developed RESTful API endpoints and state management across multiple React components.
-

Professional Experience

Logistics/Sales Representative

Harbor Freight | Rexburg, Idaho | May 2024 - Present

- * Coordinated daily shipping and receiving, ensuring accurate inventory and timely stock replenishment. *
- Communicated with sales team to manage misplaced stock and organize products daily to enhance store navigation and increase customer footfall.
